

GRHC 2008 Training Calendar

This document contains Green Roofs for Healthy Cities 2008 Training Calendar, with course dates and locations.

Green Roofs for Healthy Cities has been committed to the development of an accreditation program for green roof professionals since our first training course (Green Roof Design 101: Introductory Course) was developed and delivered in 2004. Since then we have introduced Green Roof Infrastructure: Design and Installation 201, and Green Roof Infrastructure: Waterproofing and Drainage 301. The fourth and final course in the Accreditation Program, Green Roof Infrastructure: Plants and Growing Medium 401, was launched at the 2008 Greening Rooftops for Sustainable Communities Conference in Baltimore (April 30th to May 2nd). Visit the Training Program section of our web site (www.greenroofs.org) for course descriptions.

The introduction of a broadly recognized accreditation program based on occupational standards will allow professionals to differentiate themselves in the market place, help protect the industry from project failures, and raise the overall level of professionalism in the industry.

Our training courses provide the knowledge needed by an Accredited Green Roof Professional to:

- a) Identify and pull everyone on the team together.
- b) Function as a team leader for the green roof portion of a project.
- c) Understand the different options for green roof design and implementation.
- d) Maximize the benefits of green roofs during the design process. For example, by identifying multiple design and implementation opportunities.
- e) Understand the major challenges with implementation of green roofs and the best practices associated with design and installation.

The first Accreditation Test will be offered on June 5th, 2009, our 7th Greening Rooftops for Sustainable Communities Conference in Atlanta.

To register for any of our courses, visit www.greenroofs.org. Please note that dates and locations may be subject to change.

January 2008

Sun	Mon	Tue	Wed	Thu	Fri	Sat
